Efoil Lessons (1 battery charge): \$400 (1 person)/\$500 (2 persons); (2hours)

Our experienced team will teach you how to fly the E-Foil. The E-Foil is an electric powered version of the HydroFoil. You can now fly anytime – no wind, no boats, no strings attached! The E-Foil is remote controlled, battery-powered HydroFoil that allows you to fly under any condition, no waves or towing required. This sport is an awesome cross-training tool for the new wave of foiling on surfboards, stand up paddle boards, and while kiting and windsurfing. It's a great introduction to foiling and an excellent opportunity to get on the sound side or ocean on low or no wind days. Our recommendations for booking a lesson are to consider trying an eFoil camp or 2hr session with your family and friends. This is a great way to share the lesson experience, take mini-breaks, and learn from our experienced coaches on a floating classroom.
